

MEDICAL, SECURITY, ADVISORY AND EVACUATION SERVICES.

DESCRIPTION OF SERVICES

- 1. UNPARALLELED MEDICAL CONSULTATIVE SERVICES:** Global Rescue has an exclusive relationship with Johns Hopkins Medicine, ranked the #1 hospital in the U.S. for the past 19 consecutive years. As a result, Global Rescue is able to provide our members with world class medical advice in real time, no matter where they are.
- 2. CHOICE:** Global Rescue empowers our members to decide when and where they are transported. Members are transported any time they are more than 160 miles from home and have a condition that requires inpatient hospitalization. Unlike insurance companies or platinum credit cards, Global Rescue allows our members to be transported to any hospital they choose, rather than only to the nearest “appropriate” hospital for “adequate” care.
- 3. FIELD RESCUE:** Global Rescue is the only company that transports patients from the site of illness or injury to the nearest hospital or to a waiting aircraft. Other companies generally transport from hospital to hospital.
- 4. DEPLOYABLE PERSONNEL:** Global Rescue is the only company that has the ability to deploy medical and security personnel to our members. Our qualifications are unmatched in the industry:
 - a. MEDICAL TEAMS:** Led by experienced paramedics, our deployable medical teams are proficient in operating in remote regions and consist of search and rescue personnel, special operations medics, and flight nurses and physicians. Additionally, they often deploy to serve as bedside medical advocates when one of our members is hospitalized or requires medical evacuation.
 - b. SECURITY EVACUATION:** Global Rescue is the only company that will take you to safety if there is a natural disaster, political disturbance, you are forced to leave the country or if you are in imminent danger of grievous bodily harm.
- 5. GLOBAL HOSPITAL NETWORK:** Global Rescue maintains a database of more than 3,000 hospitals, including International Centers of Excellence with relationships with Johns Hopkins and other top ranked U.S. medical institutions. When requested, we refer members to English-speaking physicians and provide emergency case management services. No other company has an international hospital network of this scope and quality.
- 6. TRAVEL INTELLIGENCE:** Global Rescue utilizes best-in-class intelligence resources, compiled by former NSA analysts. Our members have 24-hour access to Country Intelligence Reports detailing crime, terror risk, weather, medical information, and other potential threats to traveler’s safety.
